WORK EXPERIENCE

Talents

Jan 2025 - Present
Reykjavik, Iceland

AI Agent Developer | Contract / Project-Based (Remote)

- Develop AI-powered website assistants using Google Gemini API, FastAPI, Google Drive API, ChromaDB, and RAG workflows.
- Build intelligent chatbots that answer customer questions using approved company knowledge sources.
- Organize and connect knowledge bases using structured OKF content and documents such as PDF, DOC, and DOCX files.
- Integrate AI assistants directly into WordPress, Shopify, and other business websites.
- Configure assistants to support customer inquiries, business-information retrieval, appointment-related questions, and multilingual communication.
- Develop retrieval workflows that identify relevant business information before generating an answer.
- Test prompts, document retrieval, response accuracy, and user interactions.
- Collaborate with designers, SEO specialists, and business stakeholders to define AI-assistant functionality.
- Support API integration, deployment, troubleshooting, and ongoing technical improvements.
- Develop responsive WordPress websites using Bricks Builder, dynamic templates, HTML, CSS, and JavaScript.
- Build and configure Shopify storefronts, domains, payment settings, and customer-facing integrations.

Baig Secured Security

Jul 2024 - Jul 2026
Milton, Ontario, Canada

WordPress, Laravel & Automation Developer | Full-Time (Remote)

- Developed internal business applications using Laravel, PHP, JavaScript, and MySQL.
- Built CRM, HRIS, lead-management, employee-scheduling, and administrative systems.
- Automated Google Workspace workflows using Google Apps Script.
- Created automated mail-merge tools, follow-up reminders, scheduled notifications, and PDF reports.
- Converted repetitive administrative processes into automated digital workflows.
- Gathered business requirements and developed practical tools to support daily operations.
- Built and maintained company websites using WordPress, Elementor, Squarespace, HTML, CSS, and JavaScript.
- Managed website hosting, domains, DNS records, deployment, troubleshooting, and technical maintenance.
- Used Git and GitHub for version control and deployment support.

VSTECS Philippines, Inc.

Aug 2023 - Jul 2024
Talisay City, Cebu, Philippines

Full-Stack PHP/Laravel Developer | Full-Time (On-Site)

- Led the redevelopment of the company's internal Automated Support Activity system.
- Developed application features using Laravel, PHP, JavaScript, jQuery, AJAX, Microsoft SQL Server, and Oracle.
- Built modules for daily activity reports, email approval workflows, merit and demerit calculations, and Excel and PDF report generation.
- Conducted stakeholder meetings and translated business requirements into application features and development tasks.
- Designed wireframes and supported application planning.
- Supervised development team members, assigned tasks, and resolved technical blockers.
- Managed epics, user stories, sprint tasks, and pull requests using Azure DevOps.
- Implemented Git-based development workflows to improve team collaboration and reduce merge conflicts.
