WORK EXPERIENCE

Talents

Jan 2025 - Present
Reykjavik, Iceland

Shopify Developer | Contract / Project-Based (Remote)

- Build customized Shopify storefronts based on client branding, product presentation, responsive-layout, and checkout requirements.
- Configure Shopify store settings, domains, DNS records, payment gateways, and other technical requirements.
- Organize storefront content, navigation, product presentation, and customer-facing pages.
- Integrate email-marketing and abandoned-cart recovery workflows using Omnisend, Klaviyo, and Mailchimp.
- Create responsive storefront layouts that work across desktop, tablet, and mobile devices.
- Test store functionality, customer journeys, forms, links, checkout settings, and third-party integrations.
- Troubleshoot storefront, domain, DNS, payment, layout, and integration issues.
- Collaborate with designers, SEO specialists, and business stakeholders to align store structure, branding, content, and technical implementation.
- Support store launch, deployment, maintenance, and ongoing improvements.
- Integrate AI-powered website assistants to support customer inquiries, appointment assistance, and multilingual communication.

Baig Secured Security

Jul 2024 - Jul 2026
Milton, Ontario, Canada

WordPress and Laravel Developer | Full-Time (Remote)

- Built, redesigned, and maintained business websites using WordPress, Elementor, HTML, CSS, and JavaScript.
- Created responsive pages and layouts aligned with company branding and service requirements.
- Customized website sections, forms, navigation, templates, and frontend components.
- Maintained website content, page structures, and technical configurations.
- Diagnosed and resolved WordPress, plugin, responsive-layout, hosting, and frontend issues.
- Managed website hosting, domains, DNS configuration, deployment, backups, and ongoing technical maintenance.
- Used Git and GitHub for source control, application updates, and deployment support.
- Improved website usability and mobile responsiveness across desktop, tablet, and mobile devices.
- Collaborated with business stakeholders to convert website and workflow requirements into functional digital solutions.
- Supported third-party integrations, lead-generation forms, and automated business workflows.

VSTECS Philippines, Inc.

Aug 2023 - Jul 2024
Talisay City, Cebu, Philippines

Full-Stack PHP/Laravel Developer | Full-Time (On-Site)

- Developed and maintained a Laravel-based internal business application using PHP, JavaScript, jQuery, AJAX, MS SQL, and Oracle.
- Gathered stakeholder requirements and converted them into wireframes, application features, and development tasks.
- Supervised development tasks, resolved blockers, and supported project delivery.
- Managed user stories, sprint tasks, pull requests, and version-control workflows using Azure DevOps and Git.
