WORK EXPERIENCE

Talents

Jan 2025 - Present
Reykjavik, Iceland

WordPress Developer | Contract / Project-Based (Remote)

- Develop responsive WordPress websites using Bricks Builder and Elementor. Also integrate custom layouts, dynamic templates using HTML, CSS, and JavaScript.
- Convert design requirements and brand guidelines into functional, user-friendly WordPress pages.
- Create reusable website components and templates to maintain consistent styling across pages.
- Customize page layouts for desktop, tablet, and mobile devices.
- Collaborate with designers, SEO specialists, and business stakeholders to align website structure, branding, content, and technical implementation.
- Configure domains, DNS records, hosting environments, and website settings.
- Perform website testing, debugging, deployment, and ongoing technical maintenance.
- Troubleshoot layout, responsiveness, plugin, hosting, and frontend issues.
- Integrate third-party tools and business services into WordPress websites.
- Support website performance, usability, and technical improvements.

Baig Secured Security

Jul 2024 - Jul 2026
Milton, Ontario, Canada

WordPress and Laravel Developer | Full-Time (Remote)

- Built, redesigned, and maintained business websites using WordPress, Elementor, HTML, CSS, and JavaScript.
- Created responsive pages and layouts aligned with company branding and service requirements.
- Customized website sections, forms, navigation, templates, and frontend components.
- Maintained website content, page structures, and technical configurations.
- Diagnosed and resolved WordPress, plugin, responsive-layout, hosting, and frontend issues.
- Managed website hosting, domains, DNS configuration, deployment, backups, and ongoing technical maintenance.
- Used Git and GitHub for source control, application updates, and deployment support.
- Improved website usability and mobile responsiveness across desktop, tablet, and mobile devices.
- Collaborated with business stakeholders to convert website and workflow requirements into functional digital solutions.
- Supported third-party integrations, lead-generation forms, and automated business workflows.

VSTECs Philippines, Inc.

Aug 2023 - Jul 2024
Talisay City, Cebu, Philippines

Full-Stack PHP/Laravel Developer | Full-Time (On-Site)

- Led the redevelopment of the company's internal Automated Support Activity system.
- Developed application features using Laravel, PHP, JavaScript, jQuery, AJAX, Microsoft SQL Server, and Oracle.
- Built modules for daily activity reports, email approval workflows, merit and demerit calculations, and Excel and PDF report generation.
- Conducted stakeholder meetings and translated business requirements into application features and development tasks.
- Designed wireframes and supported application planning.
- Supervised development team members, assigned tasks, and resolved technical blockers.
- Managed epics, user stories, sprint tasks, and pull requests using Azure DevOps.
- Implemented Git-based development workflows to improve team collaboration and reduce merge conflicts.
